Basic Information

- Place of Origin: SHENZHEN
- Brand Name: FOVA
- Certification: CE;FCC
- Model Number: 0.96 inch Micro OLED Microdisplay
- Minimum Order Quantity: 10
- Delivery Time: 20
- Payment Terms: T/T
- Supply Ability: 10000PCS/M

Product Specification

- Color Pixel Arrangement: Square
- Interface: 16 Bit Parallel Input
- Display Size: 0.96 Inch
- Active Area: 20.1mm×15.15mm
- Resolution: 1400×1050
- Maximum Brightness: 30000cd/m2
- Display Color: Single Green
- Highlight: Pixel Arrangement LED Display Screen,
0.96 Inch LED Display Screen,
Square LED Display Screen

Product Description

Product Description:

The Micro OLED Microdisplay has a resolution of 1400×1050 pixels, which provides a crystal-clear display that is perfect for high-definition images and video playback. The display size of the Micro OLED Microdisplay is 0.96 inches, which makes it ideal for use in compact devices.

The color pixel arrangement of the Micro OLED Microdisplay is square, which provides a uniform and consistent display of images and videos. The display color of the Micro OLED Microdisplay is single green, which provides a high-contrast display that is perfect for low-light environments.

The Micro OLED Microdisplay is a full-color OLED display that provides a rich and vibrant display of colors. It is perfect for use in electronic devices that require high-quality displays, such as cell phones, wearable devices, and other electronic gadgets.

Features:

Product Name: Micro OLED Microdisplay

Maximum brightness: 30000cd/m2

Resolution: 1400×1050

Color Pixel Arrangement: Square

Active Area: 20.1mm×15.15mm

Display Size: 0.96 Inch

High Resolution LED Display

Creative LED Display Screen

Technical Parameters:

Technical Parameters	Value
Product Name	Micro OLED Microdisplay
Interface	16 Bit Parallel Input
Display Color	Single Green
Maximum Brightness	30000cd/m2
Display Size	0.96 Inch
Resolution	1400×1050
Color Pixel Arrangement	Square
Active Area	20.1mm×15.15mm

Applications:

The Micro OLED Microdisplay is commonly used in commercial LED display screens due to its high resolution of 1400×1050, providing clear and crisp images. It is also utilized in creative LED display screens due to its single green display color, allowing for unique and customizable designs.

The 16 bit parallel input interface of the Micro OLED Microdisplay makes it easy to integrate into different types of products, such as augmented reality glasses and virtual reality headsets. Its active area of 20.1mm×15.15mm and display size of 0.96 inch make it a compact and convenient option for these types of devices.

The Micro OLED Microdisplay is available for purchase with a minimum order quantity of 10 and a delivery time of 20 days. Payment terms include T/T, and the product has a supply ability of 10000PCS/M.
